## hilus biliary duct – laser cut design NEW 5 F catheter

### Hilus biliary duct stents

The hilus biliary duct stents are preloaded on the **new** TTS (through-the-scope) **5 French** introducer system and are placed through the working channel of the endoscope.

Two systems can be introduced parallel into the biliary hilum area through the papilla under visual and x-ray control.

### Practical application

The braided material of the **new** introducer guarantees a precise handling and allows an accurate and reliable stent placement under endoscopic view.

### Made in Germany

With our new product line **aixstent®** you can expect a high quality product made in Germany which meets all of your ambitious requirements fully.

There are three sectors in which Leufen Medical is acting as a role model and stent pioneer

- innovative development
- precise manufacture
- patient specific product distribution

Order information you find on the reverse side.  
Revision status September 2010

# aixstent®

## hilus biliary duct – laser cut design NEW 5 F catheter

- **NEW** exact positioning without stent shortening
- **NEW** defined high radial force at stent center, soft ends
- Memory effect of nitinol material - excellent flexibility
- **NEW** laser cut stent design
- Stent without covering
- **NEW** radiopaque tantalum markers
- **NEW** introducer
  - Length transendoscopic 1800 mm, TTS
  - Ø 1.67 mm / 5 French
  - Accepts guide wire 0.021 inch
