

## THE BREAST DAYS 2010

| DAY I – AM                          |                                                             |             |
|-------------------------------------|-------------------------------------------------------------|-------------|
| Time                                | Presentation                                                | Speaker     |
| SESSION I – BREAST CANCER DETECTION |                                                             |             |
| 9:00 AM                             | Interdisciplinary Breast Care Management                    | N. Duchesne |
| 9:30 AM                             | Fundamentals of breast pathology                            | N. Duchesne |
| 10:00 AM                            |                                                             |             |
| 10:30 AM                            | Refreshments                                                |             |
| 11:00 AM                            | Fundamentals of breast mammography                          | R. Wilson   |
| 11:30 AM                            |                                                             |             |
| 12:00 PM                            | Screening programs – optimizing compliance and recall rates | R. Wilson   |
| 12:30 PM                            | Lunch/Prayer                                                |             |
| 2:00 PM                             | Fundamentals of breast ultrasound                           | N. Duchesne |
| 2:30 AM                             |                                                             |             |
| 3:00 AM                             | Ultrasound technique demonstration                          | N. Duchesne |
| 3:30 PM                             |                                                             |             |
| 4:00 PM                             | Refreshments                                                |             |
| 4:30 PM                             | Fundamentals of breast MRI                                  | R. Wilson   |
| 5:00 PM                             |                                                             |             |

| DAY 2                                    |                                                                                       |           |                                                                                       |             |
|------------------------------------------|---------------------------------------------------------------------------------------|-----------|---------------------------------------------------------------------------------------|-------------|
| Time                                     | Presentation                                                                          |           | Speaker                                                                               |             |
| SESSION II – BREAST CANCER INTERVENTIONS |                                                                                       |           |                                                                                       |             |
| 9:00 AM                                  | Image-guided breast biopsies (incl. live biopsies rebroadcast)                        |           | N. Duchesne                                                                           |             |
| 9:30 AM                                  |                                                                                       |           |                                                                                       |             |
| 10:00 PM                                 | Rad/path correlation of concordant and discordant lesions                             |           | N. Duchesne                                                                           |             |
|                                          |                                                                                       |           | R. Wilson                                                                             |             |
| 10:30 AM                                 | Refreshments                                                                          |           |                                                                                       |             |
| SESSION III – PRACTICUM                  |                                                                                       |           |                                                                                       |             |
|                                          | GROUP A                                                                               |           | GROUP B                                                                               |             |
| 11:00 AM                                 | Case studies w/ electronic voting: mammography, ultrasound, MRI, rad/path correlation | R. Wilson | Image-guided breast biopsies (ultrasound, stereo, MRI)                                | N. Duchesne |
| 12:30 PM                                 | Lunch/Prayer                                                                          |           |                                                                                       |             |
| 2:00 AM                                  | Case studies w/ electronic voting: mammography, ultrasound, MRI, rad/path correlation | R. Wilson | Image-guided breast biopsies (ultrasound, stereo, MRI)                                | N. Duchesne |
| 3:00 AM                                  | Image-guided breast biopsies (ultrasound, stereo, MRI)                                | R. Wilson | Case studies w/ electronic voting: mammography, ultrasound, MRI, rad/path correlation | N. Duchesne |
| 4:00 PM                                  | Refreshments                                                                          |           |                                                                                       |             |
| 4:30 AM                                  | Image-guided breast biopsies (ultrasound, stereo, MRI)                                | R. Wilson | Case studies w/ electronic voting: mammography, ultrasound, MRI, rad/path correlation | N. Duchesne |
| 5:00 AM                                  |                                                                                       |           |                                                                                       |             |

| DAY 3                              |                                     |             |
|------------------------------------|-------------------------------------|-------------|
| Time                               | Presentation                        | Speaker     |
| SESSION IV – LYMPH NODE MANAGEMENT |                                     |             |
| 9:00 PM                            | Lymph node imaging and intervention | R. Wilson   |
| 9:30 AM                            | Lymph node intervention             | R. Wilson   |
| 10:00 AM                           | Refreshments                        |             |
| SESSION V – CLINICAL PROBLEMS      |                                     |             |
| 10:30 AM                           | Nipple discharge                    | N. Duchesne |
| 11:00 AM                           | Breast imaging in pregnant women    | N. Duchesne |
| 11:30 AM                           | Case studies                        | N. Duchesne |
|                                    |                                     | R. Wilson   |
| 12:00 AM                           |                                     |             |
| 12:30 PM                           | Lunch/Prayer                        |             |
